# Paker MB | C 21 – 12 000

## A WIDE RANGE

of packaging applications

### DESCRIPTION

Wrapping machine for packs of thermoformed pots (Form-Fill and Seal) using a flat-pack cardboard wrap. The cardboard wrap is sealed by gluing the underside of the pack.

Ensures great flexibility for all potential configurations. The Paker solution also ensures great upgradeability over time, allowing new products and formats to be packaged as well.

All of the settings and control functions can be accessed directly on the control panel. Entirely controlled by servo motors (not a chain drive). The ergonomics of Paker machines have been specially designed to ensure ease of use for maintenance operations.

## PAKERGROUP

# Paker MB | C 21 – 12 000

#### **TECHNICAL DESCRIPTION**

Continuous wrapping machine for packs of FFS (thermoformed) pots, 12,000 packs/h (200 packs/min). Pack glued underneath using a flat-pack carton wrap. Products in 1 or 2 layers of 1 line.

Capacity (packs/min)	150 - 200				
Dimensions (L x W x H)	7000 x 1300 x 2100				
Structure	Frame made from stainless steel, ergonomic workstation				
Change of format	< 15 min   or automatic				
Drive system:	Servo gears: SEW				
PLC	SCHNEIDER   SIEMENS   ROCKWELL AUTOMATION				
Electrical power supply	400 volts, 50Hz, or in accordance with specifications				
Pneumatic power supply	Pressure: 5 bars – Consumption: 350 NI/min				
Sealing system	Glued underneath - hot melt				
Cardboard storage	1.5 m   30 mins				
Options	<ul> <li>Cardboard storage 3m</li> <li>Servo gears: BOSCH REXROTH</li> <li>1 line</li> <li>Bar code control</li> <li>Ink jet marking</li> </ul>				

### BENEFITS

п

Π

Pit and

- High quality packaging
- Flexibility in terms of format and able to change quickly between production types

L

- Upgradeable for future formats
- Optimised access for production and maintenance teams
- Reduced maintenance costs
  - Compact equipment
