Paker MG | C 12 - 18 000

A WIDE RANGE

of packaging applications

qussets

☑ Metal box

DESCRIPTION

Multipack machine for grouping cans using a flat-pack cardboard sleeve, closed by gluing underneath.

This ensures great flexibility for everyday formats, with regular, sleek or slim cans, regardless of the dimensions of the products being grouped together or the type of packaging being used.

All of the settings and control functions can be accessed directly on the control panel. Entirely controlled by servo motors (not a chain drive). The ergonomics of Paker machines have been specially designed to ensure ease of use for maintenance operations.

Paker MG | C 12 - 18 000

Continuous wrapping machine for cans, 18,000 packs/h (300 packs/min). Glued underneath using a flat-pack carton wrap. Products in one layer over 1 or 2 rows. Turning module Diverger module

MACHINE SPECIFICATION				
Capacity (packs/min)	300			
Dimensions (L x W x H)	9500 x 1300 x 2100			
Structure	Frame made from stainless steel, ergonomic workstation			
Change of format	< 15 min or automatic			
Drive system:	Servo gears: SEW			
PLC	SCHNEIDER SIEMENS ROCKWELL AUTOMATION			
Electrical power supply	400 volts, 50Hz, or in accordance with specifications			
Pneumatic power supply	Pressure: 5 bars – Consumption: 350 NI/min			
Sealing system	Glued underneath - hot melt			
Cardboard storage	2.5 m			
Options	 Snap-pack Large capacity for cardboard storage Servo gears: BOSCH REXROTH 1 line Bar code panel 			

BENEFITS

- High quality packaging
- Flexibility in terms of format and able to change quickly between production types
- Upgradeable for future formats
- Optimised access for production and maintenance teams
- Reduced maintenance costs
- Compact equipment
